

NuSource LLC and Pall Corporation sign exclusive agreement for the supply of Safety Related and ASME Section III, replacement components

August 17, 2015
Alexandria, VA

NuSource LLC is pleased to announce that it has entered into an Exclusive Teaming Agreement with Pall Corporation. Under this agreement, NuSource will provide Safety Related (10CFR 50 Appendix B), and ASME Section III, Pall filter housings, vessels, vessel components and replacement parts for items installed in the United States, Canada, Latin America and Republic of Korea.

The Agreement enables NuSource to provide “like for like” replacement components which allows nuclear facilities to cost-effectively replace filter components in safety related applications.

For decades Pall Corporation components have provided filtration and separation technology solutions for critical applications in nuclear power facilities including:

Make-up water	Turbine lube oil	Fuel pool
Wastewater	Hydrogen seal oil	Radwaste
Steam turbine management	NSSS/CVCS filtration	Reactor water cleanup (RWCU)
EHC fluid treatment	Seal water injection (SWI)	Laundry clean-up

NuSource LLC is an accredited ASME N-Certificate holder delivering engineering and manufacturing solutions to the commercial nuclear power industry. This letter serves as notification that effective August 17, 2015; NuSource is the exclusive supplier of safety related Pall equipment and is responsible for all technical inquiries, quotations and orders.

Please update all “Order Entry Points” and “Approved Suppliers Lists” to include:
